

Brain Blast.

Maths and literacy practice that **remembers what each child finds hard** and brings it back at the right moment. It works offline, has no accounts, and keeps everything on the device.

● Maths ● Spelling ● Grammar ● Vocabulary

62

topics across 4 subjects

~70

maths question styles, 3 difficulty tiers each

1,223

hand-written items and 6 reading passages

1,079

automated tests, all passing

0

network requests: private and offline

How a session works THE LEARNING LOOP

1

Pick up

The Hub shows what's due today, the daily challenge (all four subjects) and a clear first step for new players.

2

Practise

Each round opens with due reviews, then new questions weighted to weak topics. The numbers scale with mastery.

3

Get unstuck

The first hint is free and every question can be read aloud. After two misses the answer and a "Why" appear. No dead ends.

4

Come back

First-try answers set the review date. Coins, streaks and a garden reward effort, not grinding.

1d 3d 7d 21d 60d

For the child

- **Five ways to play:** practice rounds, daily challenge, exam mode, Times Tables Turbo and the Run & Learn platformer.
- **Fair marking:** don't, 9:20 and 78p are accepted, but 12 m is not accepted for 12 cm.
- **Spoiler-free diagrams:** every visual is checked so the picture never gives the answer away.
- **Accessible:** read-aloud, a dyslexia font option, reduced motion and large tap targets.

For grown-ups

- **Grown-up gate** in front of settings, restore and profile deletion.
- **Readable progress:** what's secure, what keeps catching them out, and the last 7 days of activity.
- **This week's spelling list:** words are read aloud and never shown on screen.
- **Difficulty pin, 4 profiles,** and backup and restore with validation, so a bad save can't break the app.

Built to last

- **React 19 + Vite PWA,** also shipped as **one self-contained HTML file** that opens with a double-click.
- **Content is data:** adding a topic means registering it once; nothing else in the app changes.
- **Leitner spaced repetition** plus per-topic mastery, with the difficulty tier chosen from the evidence.
- **Property-style tests** sweep every topic × style × tier across many random seeds.

What's covered CURRICULUM

Maths

31 topics

Place value, fractions, decimals and percentages, ratio, BODMAS, algebra, angles, area and volume, coordinates, averages and graphs, time and speed, money, multi-step problems.

Spelling

298 words

Homophones, -ible/-able, -ant/-ent, silent and double letters, word roots, tricky words, spot the correct spelling, plus the family's own word list.

Grammar

501 items

Clauses and voice, punctuation and cohesion, tense, register and word class, with Scots treated as its own language alongside Standard English.

Vocabulary

172 items

Synonyms and antonyms in context, word families, morphology, and reading passages set in Scotland with inference questions.
